Pavis Premier Models – Further Information

Benchmark Index Details

Index	Details
UK Consumer Price Index	The Consumer Price Index (CPI) is a measure that examines the weighted average of prices of a basket of consumer goods and services, such as transportation, food and medical care. The speed at which the prices of the goods and services bought by households rise or fall provides a measure of inflation over a given period (Consumer Price Inflation.)
Bank of England Base Rate	The base rate is the official interest rate set by the Bank of England's Monetary Policy Committee (MPC)
ARC Sterling Private Client Indices (PCI)	Are a set of benchmarks designed by Asset Risk Consultants (ARC) to be used by private clients and their advisers in assessing the performance of any portfolio. The PCI benchmarks provide a unique insight into the actual returns being generated by a realistic and sizable peer group (over twenty investment houses contribute to the performance data).
ARC Sterling Cautious PCI	0-40% The definition of a Cautious portfolio is one where the historical variability of returns has been less than 40% of that recorded by world equities. The dominant asset classes tend to be cash, bonds and hedge funds.
ARC Sterling Balanced Equity Risk PCI	40%-60% Balanced Asset portfolios are those where the historical variability of returns has been around 50% of that recorded by world equities. Balanced asset portfolios tend to encompass the widest range of asset classes.
ARC Sterling Steady Growth PCI	60-80% The Steady Growth risk category has a risk profile of between 60 - 80% of world equity markets. They usually have a significant allocation to equities but also have exposure to a range of other asset classes.
ARC Sterling Equity Growth PCI	80%-100% The Equity Risk category encompasses all portfolios with a risk profile similar to that of the equity markets. Traditionally, such portfolios would have been tagged as "growth". Equities tend to be the dominant asset class.

Disclaimer

You should remember that past performance is not a guide to future performance. The portfolios' investments are subject to normal fluctuations and other risks inherent when investing in securities. There can be no assurance that any appreciation in value of units will occur. The value of investments and any income derived from them may fall as well as rise and investors may not get back the original amount they invested. There is no certainty the investment objectives of the portfolios will actually be achieved and no warranty or representation is given to this effect. The portfolios therefore should be considered as medium to long-term investments. All performance is given Gross of any deduction in fees with the exception of the underlying assets. The portfolios were launched on 1/1/2015.
